

LUSINE KHURSHUDYAN

IT Project Manager / IT Product Owner

Riga, Latvia | +371 20061826 | lusine.khurshudyan.98@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

IT Project Manager / Product Owner with 4 years across eCommerce (Shopify, Magento, BigCommerce), SaaS, and tech delivery. Experienced running multiple concurrent projects, owning backlogs end-to-end, and managing cross-functional teams of up to 15+ and stakeholder groups of 20+. PSPO-certified, Adobe Commerce-certified, currently expanding into Business Analysis and AI-assisted workflow tools (n8n, Claude).

WORK EXPERIENCE

IT Product Owner / Business Analyst — Magebit Jan 2025 – Feb 2026 | Riga, Latvia

- Planned and managed 6 concurrent eCommerce delivery projects (Shopify, Magento, BigCommerce) at a load of up to 5 active projects at once — above the typical 3-project load for a mid-level PO — coordinating a core team of 4–7 plus 10+ cross-functional contributors (QA, design, SEO, lead developers).
- Delivered 5 of 6 projects on time; post-delivery, 4 of 6 clients signed new contracts/projects and 2 transitioned to ongoing support retainers — a 100% client retention rate across the portfolio.
- Translated business requirements from 20+ stakeholders (clients, internal CTOs, CEOs) into actionable backlog items and user stories for development teams.
- Applied Business Analysis methods to identify needs, recommend solutions, and align delivery with client strategic goals.
- Facilitated Agile ceremonies (planning, stand-ups, retrospectives, reviews) across multiple workstreams simultaneously to maintain delivery transparency.
- Mentored team members through structured development plans, supporting growth and retention.

Team Lead (Quality Support Analyst) — TELUS International Aug 2023 – Dec 2024 | Riga, Latvia

- Maintained production quality standards while managing stakeholder communication and team coaching.
- Led day-to-day team guidance during a transitional period while relocating into the Latvian job market.

IT Product Owner — Neetry Jan 2023 – Aug 2023 | Remote

- Owned and prioritized the product backlog for a team of 4–7, authoring and refining user stories from complex business requirements.
- Ran a Kanban-based delivery flow (no fixed sprints), translating direct customer feedback into prioritized, shippable features.
- Monitored sprint/flow progress and unblocked technical hurdles to protect delivery quality and timelines.

IT Project Manager — Wesage Apr 2020 – Jan 2023 | Yerevan, Armenia

- First IT role: built foundational PM/PO skills while managing a team of 4–7 on a Kanban workflow.
- Served as primary point of contact for the organization, aligning stakeholder expectations with team capacity.
- Led transparent backlog management so stakeholders had clear visibility into product direction and timeline trade-offs.
- Authored and communicated backlog items, converting business requirements into actionable user stories.

CURRENT FOCUS (2026)

Self-directed upskilling following Magebit, in preparation for the next role:

- Deepening Business Analysis skills and methodology.
- Latvian language study (currently A2, actively progressing toward B1).

- Hands-on with AI and automation tools — n8n, Claude — for workflow and delivery efficiency.

CERTIFICATIONS

- Professional Scrum Product Owner (PSPO) — Scrum.org, Aug 2025
- Adobe Certified Professional – Adobe Commerce Business Practitioner — Adobe, Jun 2025
- Solution Planning Fundamentals — Shopify, May 2025
- Claude 101 — Anthropic, 2026
- n8n Certification — n8n, 2026

SKILLS

- Project & Product Management: Scrum, Kanban, Scrumban, backlog management, roadmapping, stakeholder management (20+ concurrent stakeholders), Agile ceremonies
- Tools: Jira, Trello, Postman, Git, Microsoft Office, n8n, Claude
- Technical: HTML, CSS, MySQL
